

I just want to say that K-love radio station is a great station to listen to. I don't have to worry about the content even when my small children are listening and lives are actually changed for the better from listening to this station.

It would be a great loss if we as a community were to lose this station if it were to be displaced by an LPFM broadcaster providing other programming!!

I truly believe it is in the best interest of the community to be able to keep this station. Again lives are changed for the better. People I believe have turned from a life of drugs and destructive live styles. I also believe that there have been people that have been ready to commit suicide and by listening to the programming of K-Love have made a complete turn around and their lives saved!!
